# Service Manual

**DB338R**

**RDS-EON FM/MW/LW**

**Radio CD Combination**

Model **DB338R/DB338RB**  
(PE-2580E-A/E-B)

Model **BD239R/BD239RG**  
**DB238R**  
(PE-2581E-A/E-B/E-C)

## SPECIFICATIONS

### Radio section

Tuning system: PLL synthesizer tuner  
Receiving frequencies: FM : 87.5 to 108 MHz  
(0.05 MHz steps)  
MW : 531 to 1602 kHz  
(9 kHz steps)  
LW : 153 to 279 kHz  
(3 kHz steps)

### CD player section

System: Compact disc digital audio system  
Frequency response: 10 Hz to 20 kHz (+1/-1 dB)  
Signal to noise ratio: 100 dB (1 kHz) IHF-A  
Dynamic Range: 95 dB (1 kHz)  
Distortion: 0.01%

### General

Output power : 27 W x 4  
(DIN45324, +B=14.4 V)  
Power supply voltage: 14.4 V DC (10.8 V to 15.6 V allowable),  
negative ground  
Power consumption: Less than 15 A  
Speaker impedance: 4ohm(4ohm to 8ohm allowable)  
Auto antenna rated current:  
500 mA or less  
Weight: 1.15 kg  
Dimensions: 178(W) x 50(H) x 155(D)mm

\* Specifications and design are subject to change without notice for further improvement.

## NOTE

\* We cannot supply PWB with component parts in principle. When a circuit on PWB has failure, please repair it by component parts base. Parts which are not mentioned in service manual are not supplied.

\* CD-ROM discs cannot be played by this unit.

## COMPONENTS

### PE-2580E/PE-2581E

Main unit	-----	1
Mounting bracket	300-7742-00	1
DCP case	335-6035-20	1
Escutcheon(OUT-ES)		1
Only PE-2580E-A/B/PE-2581E-C	370-6029-00	1
Only PE-2581E-A/B	370-6029-01	1
Parts bag	-----	
Removal key	331-2497-00	2
Rubber part	345-3653-20	1
Screw	716-0726-01	1
A-lead	850-6681-50	1

## FEATURES

1. 1-Bit D/A Converters and 8-Times Oversampling Digital Filter.
2. DIN Chassis with Detachable Control Face with Green Negative LC Display.

DB238R  
DB338R/DB  
BD239R/BD

## To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

### 1. Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.

The use of unspecified parts shall be regarded as remodeling for which we shall not be liable. The onus of product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

### 2. Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulation tubes, bonding, gaps to PWB, etc., is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection. If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

### 3. Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

### 4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

### 5. Cautions regarding chips.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc.). The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.

### 6. Cautions in handling flexible PWB

Before working with a soldering iron, make sure that the iron tip temperature is around 270 °C. Take care not to apply the iron tip repeatedly (more than three times) to the same patterns. Also take care not to apply the tip with force.

### 7. Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

### 8. Cautions in checking that the optical pickup lights up.

The laser is focused on the disc reflection surface through the lens of the optical pickup. When checking that the laser optical diode lights up, keep your eyes more than 30cms away from the lens. Prolonged viewing of the laser within 30cms may damage your eyesight.

### 9. Cautions in handling the optical pickup

The laser diode of the optical pickup can be damaged by electrostatic charge caused by your clothes and body. Make sure to avoid electrostatic charges on your clothes or body, or discharge static electricity before handling the optical pickup.

#### 9-1. Laser diode

The laser diode terminals are shorted for transportation in order to prevent electrostatic damage. After replacement, open the shorted circuit. When removing the pickup from the mechanism, short the terminals by soldering them to prevent this damage.

#### 9-2. Actuator

The actuator has a powerful magnetic circuit. If a magnetic material is put close to it, its characteristics will change. Ensure that no foreign substances enter through the ventilation slots in the cover.

#### 9-3. Cleaning the lens

Dust on the optical lens affects performance. To clean the lens, apply a small amount of isopropyl alcohol to lens paper and wipe the lens gently.

## CAUTIONS

This appliance contains a laser system and is classified as a "CLASS 1 LASER PRODUCT". To use this model properly, read this Owner's Manual carefully and keep this manual for your future reference. In case of any trouble with this player, please contact your nearest "AUTHORIZED service station". To prevent direct exposure to the laser beam, do not try to open the enclosure.

Bottom view of Main Unit

## NOTES OF ISO CONNECTOR

1. For VW and Audi vehicles, change the position of fuse installation as shown on the diagram. (Figure 1)

### ISO CONNECTOR type

Main unit side ISO connector

Figure 1

DB238R  
DB338R/RB  
BD239R/RG

2. When the car stereo is installed in 1998 and later Volkswagen models, make sure to cut the car lead wire connected the A-5 terminal. (A breakdown could occur if the lead wire is not cut.) After cutting the lead wire, insulate the front end of the lead wire with insulation tape to prevent the risk of short-circuits. (Figure 2)

Figuer 2

Note: Before cutting the lead wire, disconnect the car battery - (negative) cable.

3. When the Main unit is also connected to an external amplifier in a wiring procedure, connect REMOTE on the external amplifier to the previously cut lead wire on the side of the connector.

## ERROR DISPLAYS

If an error occurs, one of the following displays is displayed.  
Take the measures described below to eliminate the problem.

Error Display	Cause	Measure
<b>ERROR 2</b>	A CD is caught inside the CD deck and is not ejected.	This is a failure of CD deck' s mechanism.
<b>ERROR 3</b>	A CD cannot be played due to scratches, etc.	Replace with a non-scratched, non-warped-disc.

If an error display other than the ones described above appears, press the reset button.

## TROUBLESHOOTING

Problem	Cause	Solution
Power does not turn on. (No sound is produced.)	Fuse is blown.	Replace with a fuse of the same amperage. If the fuse blows again.
	Incorrect wiring.	Read the attached "Installation/Wire connection Guide" once again and wire properly.
Compact disc cannot be loaded.	Another compact disc is already loaded.	Eject the compact disc before loading the new one.
Sound skips or is noisy.	Compact disc is dirty.	Clean the compact disc with a soft cloth.
	Compact disc is heavily scratched or warped.	Replace with a compact disc with no scratches.
Sound is bad directly after power is turned on.	Water droplets may form on the internal lens when the car is parked in a humid place.	Let dry for about 1 hour with the power on.
Nothing happens when buttons are pressed. Display is not accurate.	Microprocessor has malfunctioned due to noise, etc.	Turn off the power, then press the Release button and remove the DCP. Press the reset button for about 2 seconds with a thin rod.
	DCP or main unit connectors are dirty.	Wipe the dirt off with a soft cloth moistened with cleaning alcohol.

Reset button

The schematic diagram illustrates the internal circuitry of a portable CD player. Key components and their functions include:

- FM/AM Tuner (880-2090C):** Receives radio signals from the antenna (ANT) and provides input to the CD player section.
- CD Player Section:**
  - GS-1 CDMECH:** The CD mechanism, connected to the CD player IC (IC601) via a CD SW (Q201, Q202, Q203).
  - IC601 (UPD178078GF-591-38A):** The main digital processing IC, which handles the CD data and provides control signals to the display and other components.
- Power Supply:**
  - IC102 (HA13164A):** A power supply IC that regulates the voltage for the CD player and other components.
  - Power Sources:** Includes a 1.5V battery (B/U DETECT) and a 14V key (KEY 14V).
- Display and Controls:**
  - LCD:** The liquid crystal display, driven by the DISPLAY DRIVER (PT6554Q, IC701).
  - KEY MTRIX:** A matrix of control keys for the display.
  - ROTARY VOLUME:** A volume control knob.
- Output and Miscellaneous:**
  - Q452-Q455:** Transistors used for the MUTE function.
  - IC101 (LA47532):** A 4CH speaker output driver.
  - Q605:** An INVARIBLE CURRENT CIRCUIT.
  - Q607:** A KEY 14V component.

The diagram shows a complex network of connections between these components, including power lines, data lines, and control signals. It also includes various passive components like resistors and capacitors, and a ground (GND) connection.

# EXPLANATION OF IC

052-1935-00 uPD178078GF-591-3BA CD & RDS Radio Control

## 1. Terminal Description

pin 1: PHONE.INT	: IN: The telephone interrupt signal input.
pin 2: KEY.INT	: IN: Key interrupting signal input.
pin 3: LCD.SI	: IN: Serial data input from the LCD driver.
pin 4: LCD.SO	: O: Serial data output to the LCD driver. ry encoder.
pin 5: LCD.SCK	: O: The clock pulse output to the LCD driver. ry encoder.
pin 6: LCD.CE	: O: The chip enable signal output to the LCD driver.
pin 7: CD.ZMT.CUT	: O: Zero cross mute cutting signal output.
pin 8: SYS.MUTE	: O: System muting signal output.
pin 9: REM +B	: O: The system power supply control signal output.
pin 10: AMP-REM	: O: Standby signal output to Audio power amplifier.
pin 11: NU	: IN: Connected to GND.
pin 12: NU	: O: Not in use.
pin 13: NU	: IN: Connected to GND.
pin 14: NU	: IN: Connected to GND.
pin 15: NU	: IN: Connected to GND.
pin 16: NU	: IN: Connected to GND.
pin 17: NU	: IN: Connected to GND.
pin 18: NU	: IN: Connected to GND.
pin 19: NU	: IN: Connected to GND.
pin 20: NOISE-DISCHG	: O: RDS noise discharge signal output.
pin 21: VOL.CLK	: O: The clock pulse output to the volume IC.
pin 22: VOL.DATA	: O: The serial data output to the volume IC.
pin 23: KEY.A/D	: IN: Input terminal of A/D converter for Key judgment.
pin 24: RDS-SM	: IN: The input terminal of Internal A/D converter to monitor the FM radio field strength.
pin 25: RDS-NOISE	: IN: RDS noise level detector input.
pin 26: NU	: IN: Connected to GND.
pin 27: VDD	: - : Positive supply voltage.
pin 28: VOL.CW	: IN: Volume control pulse input from the rotary encoder.
pin 29: VOL.CCW	: IN: Volume control pulse input from the rotary encoder.
pin 30: NU	: IN: Connected to GND.
pin 31: NU	: IN: Connected to GND.
pin 32: GND	: - : Ground.
pin 33: CPU REG	: - : The capacitor connection for CPU.
pin 34: VDD	: - : Positive supply voltage.
pin 35: OSC REG	: - : The capacitor connection for the internal oscillator.
pin 36: X.OUT	: - : Crystal connection.
pin 37: X.IN	: - : Crystal connection.
pin 38: GND	: - : Ground.
pin 39: NU	: IN: Connected to GND.
pin 40: GND	: - : Ground.
pin 41: AM-IF	: - : The input terminal of the internal counter for AM IF.
pin 42: FM-IF	: - : The input terminal of the internal counter for FM IF.
pin 43: VDDPLL	: - : Positive supply voltage for PLL.
pin 44: FM-OSC	: - : The input terminal of the internal counter for FM OSC ( Local Oscillation ).
pin 45: AM-OSC	: - : The input terminal of the internal counter for AM OSC ( Local Oscillation ).
pin 46: GND	: - : Ground.
pin 47: FM-VT	: - : The PLL error signal output for FM.
pin 48: AM-VT	: - : The PLL error signal output for AM.
pin 49: GND	: - : Ground.
pin 50: RESET	: - : Reset signal input.

pin 51: RDS.CLK	: IN: RDS clock pulse input.
pin 52: RDS.DATA	: IN: RDS serial data input.
pin 53: FM.ON	: O: FM ON signal output.
pin 54: AM.ON	: O: AM ON signal output.
pin 55: MUTE.SPEED	: O: Station detection speedup command output.
pin 56: IF.REQ	: O: IF counter output.
pin 57: FM.ST/SD	: IN: This port detects the station detection signal.
pin 58: RDS.MUTE	: O: RDS mute signal output.
pin 59: M-TEST	: IN: The diagnosis ON signal input.
pin 60: TEST.ST	: O: Stereo display check command output.
pin 61: NU	: IN: Not in use.
pin 62: FM-DX/LO	: O: FM DX LOCAL control switch.
pin 63: NU	: IN: Not in use.
pin 64: NU	: IN: Not in use.
pin 65: NU	: IN: Not in use.
pin 66: CD-5V.REM	: O: 5V CD power supply circuit control signal output.
pin 67: ILL-REM	: O: The power supply ON signal output for the illumination.
pin 68: NU	: IN: Not in use.
pin 69: CD-TR-B	: IN: The photo sensor signal input from the CD mechanism.
pin 70: CD-TR-A	: IN: The photo sensor signal input from the CD mechanism.
pin 71: ILL-DET	: IN: Illumination ON signal input.
pin 72: CD-LDCONT	: I/O: Loading control signal input/output.
pin 73: CD-LDMUT	: O: CD Loading Mute signal output.
pin 74: CD-UBCK	: O: The clock pulse output to the CD IC.
pin 75: CD.BUS 3	: I/O: The data bus.
pin 76: CD.BUS 2	: I/O: The data bus.
pin 77: CD.BUS 1	: I/O: The data bus.
pin 78: B/U.DET	: IN: Backup detection signal input.
pin 79: ACC.DET	: IN: ACC detection signal input.
pin 80: DC-OFFSET-DET	: IN: Power IC offset signal input.
pin 81: CD.SBSY	: IN: The sub Q data request command input from the CD IC.
pin 82: GND	: - : Ground.
pin 83: CD.BUS 0	: I/O: The data bus.
pin 84: CD.CCE	: O: The chip enable signal output to the CD IC.
pin 85: CD-SSTOP	: IN: A loading, detects the chucking. And next, detects the inside limit of the pick up position.
pin 86: CD-CHCK.SW	: IN: The CD disk chucking signal input from the CD mechanism.
pin 87: NU	: IN: Connected to GND.
pin 88: RDS-TEST	: IN: The power supply ON signal output for the illumination.
pin 89: NU	: IN: Connected to GND.
pin 90: CD-RESET	: O: The reset pulse output to the CD IC.
pin 91: NU	: IN: Connected to GND.
pin 92: AM-DX/LO	: O: The sensitivity selection signal output.
pin 93: NU	: IN: Connected to GND.
pin 94: DIM-CONT	: O: The dimmer control signal output.
pin 95: NU	: IN: Connected to GND.
pin 96: STAND-BY	: O: Standby signal output.
pin 97: NU	: IN: Connected to GND.
pin 98: NU	: IN: Connected to GND.
pin 99: VDD	: - : Positive supply voltage.
pin100: GND	: - : Ground.
